### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clifford J. Mass on 10/14/05.

The application has been amended as follows:

- In claim 15, line 12, change "(c)" to --(d)--
- In claim 15, line 16, change "(d)" to --(e)--
- In claim 16, line 3, change "(e)" to --(f)--

### ***Allowable Subject Matter***

Claims 9-23 are allowed.

The following is an examiner's statement of reasons for allowance: The applicant argues, "The claimed invention is based on the above findings and the claims as amended require all of the following three elements: (a) polyethylene terephthalate (PET) film as heat resistant substrate; (b) an elastic layer comprising elastic material having a hardness less than HA40; and (c) a recording material having a finely roughened surface with raised portions having a height of 5-20 um and a pitch of 50-500 um. This combination of features is not shown or suggested in the cited art..." The examiner agrees with these arguments. Each of the three elements is individually known to one of ordinary skill in the art. However, the examiner cannot find proper

motivation to combine the art that teaches these elements. Furthermore, though the examiner found a lot of art relating to a roller with an elastic layer comprising elastic material having hardness less than HA40, none of this art was related to using the roller in a laminating device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tabuchi et al (US PgPub 20030059717) discloses a plate-making type printing press, multi-color printing press and plate-making type printing method.

Miyamoto et al (US PgPub 20030137572) discloses an ink-jet recording apparatus, ink-jet recording method and ink jet recording medium.
